

Declaration of non-hazardous (to health) condition of the product/components sent to Vermes Microdispensing GmbH (VERMES) for repair or maintenance

Dear customer,

To protect our employees, all products/components sent for repair or maintenance must be free of all harmful substances.

Repair and/or maintenance can only be proceeded, when

- This declaration is filled out completely, signed by an authorized representative, and is sent together with the product.
- The product/components, as well as all directly connected parts are free of harmful substances, and contaminations.
- We are informed about all possible hazards, and safety data sheets are provided where necessary.

Without this declaration, all sent products/components will remain in "**quarantine**" storage until further clarification. Processing will only begin after the declaration has been received and necessary actions (e.g. complete retrospective cleaning) have been carried out.

Please note: Decontamination of the components by VERMES will only be done based on a separate agreement, and upon receipt of the necessary safety data sheets. Such cleaning will be billed separately based on effort.

This declaration is valid for the products/components listed on the next page.

Declaration of substances used by you in this product/component

Substance used (please check)		YES	NO	If YES, please define
Hazardous to the environment
